

BUILD AMERICA BUY AMERICA ACT

BABAA compliance statement for Vikinor USA, LLC

Vikinor has been a global leader in thermal control equipment for critical infrastructure for nearly 15 years. Our company is founded on the principle of having a positive impact on people and the planet through our work. This is why we're committed to sustainable practices both through the products we design and the way our business operates.

With international operations in Europe, Asia, Africa, and the United States, our goal is to provide world-class products, **globally**, while also supporting the local economy and communities in which we do business. To reinforce this effort for US markets, we are proud to announce Vikinor USA's commitment to compliance with the Build America Buy America Act (BABAA).

In consideration of BABAA as well as the Broadband Equity Access and Deployment (BEAD) program, Vikinor is pleased to offer the below thermal control equipment manufactured in Romeoville, IL, USA, for consideration in any BEAD or BABAA project.

Product type: <u>Air conditioners</u>	Select models in Vikinor series: *1*2 <u>VAK SLIM, VAK COMPACT</u>
<u>Heat Exchangers</u>	<u>VHC Cross-Flow</u>

*1: BABAA compliant products must be requested and confirmed at time of order.

*2: BABAA compliance limited to select models. Not all models available, subject to change at any time.

Your success is our priority. Every infrastructure project is different, and Vikinor is proud to offer world class products, manufactured specifically for the US market. Read more at www.vikinor.com/babaa
